News for immediate release

Asia-based Unique Logistics Moves Rates into CargoSphere Cloud

- Forwarder uses frictionless contract management to
centralize rates for its global operation of over 50 offices.

Chapel Hill, North Carolina, July 6, 2016 - CargoSphere, the leading provider of rate distribution and cloud-based global freight rate management, today announces that Unique Logistics International, an Asian-based global freight forwarder and supply chain management company, has expanded its relationship with CargoSphere to streamline contract and rate management and real-time access to ocean freight rates for its global offices. Unique Logistics' pricing teams are self-managing ocean carrier rates with CargoSphere's SUDS (smart upload and diagnostic solution) solution, which enables them to immediately upload carrier rates and subsequent rate updates directly into their centralized rate database in the CargoSphere cloud.

"CargoSphere is a user-friendly contract management solution that enables us to quickly and easily manage and distribute rate updates online in real-time to our offices and agents allowing for a faster response to rate requests. This improves customer satisfaction and reinforces Unique Logistics' customer-oriented approach. Furthermore, CargoSphere's cloud platform is our path to time and cost savings, as well as improved data accuracy," said Victor Chau, Assistant General Manager - Ocean, Unique Logistics Group.

"We're seeing greater demand from logistics companies seeking collaborative, cloud technology that increases productivity and helps fuel customer wins for sales and operations. Unique Logistics will reduce a significant amount of time and effort by systematizing their rates in a single database of past, present and future freight rates for more timely quoting, performance evaluation, and invoicing down the line," said Neil Barni, President of CargoSphere.

About Unique Logistics International

Headquartered in Hong Kong, the Unique Group currently operates over 50 offices world-wide with a team of over 800 dedicated staff. With their extensive agency network, they offer a wide range of supply chain solutions for major manufacturers and retailers by air, sea and road in 65 countries.

Speed, Accuracy, and Reliability are Unique's primary objectives for every shipment. Their goal is not only to fulfill the needs of their clients by rendering the best available services at all times, but also to continuously seek new ways to reduce their clients' logistics costs, to improve efficiency and to develop new and innovative logistics solutions. Continuous Improvements give Unique Logistics' clients and the company a competitive edge in their respective lines of business.

At Unique, Dedication is their core value - Dedication to clients, Dedication to staff, and Dedication to working partners; it is the driving force behind everything they do. For more information, visit: http://www.unique-logistics.com/en/aboutus.php

About CargoSphere

The CargoSphere rate technology platform delivers frictionless rate distribution and networking.

Cloud-based, systematized contract and rate management provides the CargoSphere user community with accurate and collaborative rate distribution, sharing, comparison and quoting, as well as the ability to self-publish FMC tariffs. The CargoSphere Rate Mesh connects shipping partners for seamless, confidential rate collaboration in real-time to simplify rate communication and provide a faster, more effective way to receive and distribute freight rates.

During these competitive times, CargoSphere offers users significant productivity improvements from CargoSphere's cloud technology due to increased data accuracy and the ease associated with a systematized database with a single source of truth. For more information, visit: www.cargosphere.com
